

# PVWT Water Tower Rehabilitation Project

Prairie Village Water Trust is following up regarding the **water tower rehabilitation project** and the temporary limitations to our water system.

As previously communicated, the water tower has been drained and is currently undergoing rehabilitation, including necessary repairs and repainting. The project is expected to take approximately **6–8 weeks**, depending on weather and temperature conditions.

While the tower is out of service, our normal **250,000-gallon water reserve is unavailable**, and fire flow is temporarily limited to approximately **1,000 gallons per minute**, which is the capacity produced by the wells.

As a reminder, we kindly ask that **fire hydrant drills and other activities requiring the use of fire hydrants continue to be limited during this project**. This will help us maintain adequate water capacity and reliable service throughout the rehabilitation period.

We will provide another update once the project has been completed and the water tower and water system have returned to normal operation.

If there are any concerns that may arise here are the Trustees' phone numbers.

Jon Russell - [414-651-0996](tel:414-651-0996)

John Rossbach - [262-470-8618](tel:262-470-8618)

Ed Westrick - [262-470-6414](tel:262-470-6414)

Thank you for your continued cooperation and understanding.
